#### GENERAL INFORMATION:

MOSQUITO BITS® is a highly selective microbial insecticide effective against mosquitoes in a variety of habitats. When scread uniformly over the surface of containerized water the BITS release a biological mosquito larvicide at the water's surface. This larvicide gradually settles in the water where it is eaten by mosquito larvae growing there. MOSQUITO BITS® may be used in all types of containerized standing water sites where mosquito larvae grow. The BITS will give a guick kill within 24 hours. For more residual long term control please consider the use of MOSQUITO DUNKS® after applying MOSQUITO BITS®. Employ a seven to fourteen day interval between applications.

## Summit ... responsible solutions.

Biological ALSO CONTROLS FUNGUS GNATS

USE IN: • Water gardens Flower pots • Bird baths

KILLS MOSQUITO LARVAE THAT TRANSMIT:

Malaria • Dengue Hemorrhagic Fever

## Treats up to 2178 sq. ft.

per pound of product). Potency units should not be used to adjust rates beyond

Net Contents: 80z. EPA REG. NO 6218-73 EPA EST. NO 6218-MD-2

KEEP OUT OF REACH OF CHILDREN

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

#### OUTDOOR USE AROUND THE HOUSEHOLD

Sprinkle one teaspoon per 25 square feet or one tablespoon per 75 square feet (1/2 lb. per 2178 square feet) over the surface of the containerized standing water found around the home. MOSQUITO BITS® should be applied uniformly. A seven to fourteen day interval between applications should be employed. Longer periods of mosquito suppression will be obtained with the subsequent use of MOSQUITO DUNKS®

MOSQUITO BITS® can be applied to areas that contain aquatic life, fish and plants. Can be applied to areas used by or in contact with humans, animals, horses, livestock, pets, birds or wildlife. DO NOT APPLY TO finished, treated human drinking water sources.

APPLY TO CONTAINERIZED STANDING WATER FOUND NEAR THE HOUSE SUCH AS Tree holes

- · Water gardens
- Flower pots
- · Unused swimming pools Old automobile tires · Rain barrels
- · Roof gutters
- · Animal watering troughs

· Bird baths

FUNGUS GNAT CONTROL: Sprinkle or spread the granules over the soil until the area is covered. Water will release the Bti into the soil where the larvae of the Fungus Gnats will feed on it and die. Repeat this process for a three-week period for control. If Fungus Gnats reappear start process over, sprinkling granules on and watering again for a three-week period.
